RES : 080-28561744

Date : 4/2/18

1. Name : KRIDL			
2. Address : BANGALORE Survey No.:		Taluk : Bangalore Dist : Bangalore	
3. Topography of the area.		Plain Terrain	
4. Geology of the area.		Gneissic	
5. Geohydrological condition of the area		Moderate	
6. Survey conducted for	A. Type of Area	Agriland / Site / Layout /	
	B. Purpose	Irrigation / Domestic / Water Supply	
7. Method of Survey Employed :		Geological - Geophysical - Geohydrological	
8. RECOMMENDATION	A. Type of well	$6\frac{1}{2}$" Dia Bore well	
	B. Location	Shown	
	C. Depth	850 ft	
	D. Probable casing	120 to 140 ft	
9. YIELD EXPECTED*		2"	
10. SPECIAL RECOMMENDATION IF ANY		Outer P.V.C. Casing is required	

*Conditions Apply.

To,

Sri/ Smt: K R I D L
BANGALORE.

Sir,

Sub:- Report of Geophysical & Geo – Hydrological Investigation.

Geo-hydrological Survey and Geophysical resistivity Investigation was carried out as per your request dated 13/2/18.. in your Land / Site survey / Site No..... Located at SAHKAR NAGAR Village, ...taluk, BANGALORE District, on dated..13/2/18 order to assess the ground water potential of the area for drinking / industrial purpose. The observations and recommendations are as follows.

1. From the study of the field observations together with the Geo-hydrological Survey / Geophysical resistivity investigation result a bore well of 175 mm diameter is recommended for drilling at site no. ..... to a depth of ..400 to ..500.. / ft below the ground level casing pipe required to a depth of ..120 to 140..ft below ground level. The selected site was show to Sri/ Smt. VARUN.B.R..... yield ..2"..... to ..... GPH.

2. Although the best site for drilling has been suggested, no guarantee of success can be given and the agency will not be responsible in any way for any loss to the party in respect of the B.W. drilled at the site recommended being a failure.

3. The Geophysical and Geo-hydrological survey has revealed that the area is fusible for borewell due to sufficient ground water potential.

Yours faithfully
Thopegowda.
